The 3 Steps to IT Unification

Unification maximizes what you're already using, plugs the gaps in how those systems are managed, and permits you to streamline your infrastructure.

Your department wins and your users win.

01

02

03

Identify

Assess your entire IT environment and determine the core platform(s) that will help you deliver the services and support you need in the most efficient way.

Integrate

Incorporate your new core stack into areas where there are unmet needs or underperforming solutions. Listen to your users: they'll tell you where those problems exist.

Consolidate

Get rid of what's not needed. You'll gain deeper vendor relationships with the suppliers of your core stack and learn more about what's possible from those systems after you reduce sprawl.

JumpCloud® helps IT teams Make Work Happen® by centralizing management of user identities and devices, enabling small and medium-sized enterprises to adopt Zero Trust security models. JumpCloud has a global user base of more than 200,000 organizations, with more than 5,000 paying customers including Cars.com, GoFundMe, Grab, ClassPass, Uplight, Beyond Finance, and Foursquare. JumpCloud has raised over $400M from world-class investors including Sapphire Ventures, General Atlantic, Sands Capital, Atlassian, and CrowdStrike.
